

# POST SURGERY COMPRESSION GARMENTS

Dr Somia will measure you for post-operative compression garments at your pre-op consultation.

These garments are essential to manage post operative swelling and assist in reattaching your skin to the underlying tissues.

You will wear your compression garments 24/7 for 6-12 weeks after your surgery (Dr Somia will advise when you can stop). The garments will include any area that has been treated.

You will wake up in your garment and will be given 2 garments for washing purposes.
