

Surgical Garments for Better Outcomes

June 23

TO ENSURE SAFETY & THE BEST SURGICAL OUTCOMES SURGICAL COMPRESSION GARMENTS MUST BE:

- Class 2 Flat knit
- Waist to toe
- Fitted with Bathroom ease - open crotch (or zipper if using Medi Aus)
- Organised 4 months before for fit & to factor in production
- Worn 3-4 weeks before to ensure comfort, soften the adipose tissue and any fibrosis ready for surgery

Providers:

- Medi Australia - Mandy 0498 021 039 or or Axel 0458 038 130
- Bauerfeind - Khris Guru 0455 335 550
- OAPL - Jenny 02 9319 1955 oapl.com.au/service/compression-therapy/
- Flow Garments Sarah - 0433 585 143 (Victoria)
- Czsalus garments are not appropriate for surgical compression

Investing in your surgical outcome

Custom made compression is the best option to fit your body perfectly, provide the correct medical compression (avoids a tourniquet effect) and can be made with bathroom ease. Custom garments will cost approximately \$700-\$1000. This is a vital investment in your surgical journey. We want you to be as comfortable as possible, achieve the best possible results and above all reduce the risk of post operative complications. This can only be achieved with custom garments. Many patients spend more on off the shelf garments trying to find something that fits with little success.

Important: Without appropriate compression your surgery may be postponed.

"The majority of us with Lipoedema need custom made compression as we do not usually fit the 'standard' shape that off the shelf compression is designed for."

- Anonymous Lipoedema patient
